We can offer **top dish knives** up to 220 mm outside diameter, with bevel type single, compound or hollow, and bore type simple or bayonet.

To ask for specific size and dimensions for the **top dish knives**, and for all other information, please CONTACT US.

## Bottom Knives

INO-DJT established its reputation in many years of manufacturing **Bottom Knives**, to meet needs of variety industries. With our highly experienced team and high-tech machines we manufacture durable **bottom knives**, made strictly by the customer request.

We produces and supplies a wide range of **bottom knives**, for all kinds of use, regardless of its industry.

Some of the industries in which they are used:

- Abrasives
- Carpet
- Food processing
- Leather
- Metals and foils
- Paper
- Packaging
- Poultry
- Plastics
- Rubber
- Textiles

We use high quality tool steels and stainless steels specifically selected for your industry, such as 52100, D-2/3, 0-1, M-2, ASP 23, or you can see more materials on section MATERIALS.

We can offer **bottom knives** up to 320 mm outside diameter, with bevel type single or compound.

To ask for specific size and dimensions for the **bottom knives**, and for all other information, please CONTACT US.

## Circular Knives

INO-DJT established its reputation in many years of manufacturing **Circular Knives**, to meet needs of variety industries. With our highly experienced team and high-tech machines we manufacture durable **circular knives**, made strictly by the customer request.

We produce and supply a wide variety of high quality **circular knives** and circular blades, with wide range of tooth patterns.

Our circular knife range covers a wide variety of industries, such as:

- Abrasives,
- Carpet,
- Food processing, Leather,
- Metals and foils,
- Paper,
- Packaging,
- Poultry,
- Plastics,
- Rubber,
- Textiles.

We use high quality tool steels and stainless steels specifically selected for your industry, such as 52100, D-2/3, 0-1, M-2, ASP 23, or you can see more materials on section MATERIALS.

We can offer **circular knives** up to 300 mm Diameter with bevel type single or compound.

To ask for specific size and dimensions for the **circular knives**, and for all other information, please CONTACT US.

## Core Cutting Knives

INO-DJT established its reputation in many years of manufacturing **Core Cutting Knives**, to meet needs of variety industries. With our highly experienced team and high-tech machines we manufacture durable **core cutting knives**, made strictly by the customer request.

We produce and supply a wide range of **core cutting knives**, also known as burst slitter knives, that are used in many different industries involving:

- Paper
- Film cutting
- Foil converting
- Packaging
- Rubber converting
- Cardboard
- Plastic cores
- ...

We use high quality tool steels and stainless steels specifically selected for your industry, such as 52100, D-2/3, 0-1, M-2, ASP 23, or you can see more materials on section MATERIALS.

We can offer **core cutting knives** up to 320 mm outside diameter.

To ask for specific size and dimensions for the core cutting knives, and for all other information, please CONTACT US.

## Perforating Blades and Knives

INO-DJT established its reputation in many years of manufacturing **Perforating Blades and Knives**, to meet needs of variety industries. With our highly experienced team and high-tech machines we manufacture durable **perforating blades**, made strictly by the customer request.

We produce and supply a wide range of **perforating blades and knives** with different tooth forms, for a wide array of cut types and for all kinds of use, regardless of its industry.

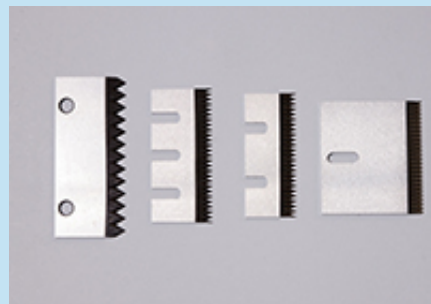

Some of the industries in which they are used:

- Abrasives
- Carpet
- Food processing
- Leather
- Metals and foils
- Paper
- Packaging
- Poultry
- Plastics
- Rubber
- Textiles

We use high quality tool steels and stainless steels specifically selected for your industry, such as 52100, D-2/3, 0-1, M-2, ASP 23, or you can see more materials on section MATERIALS.

We can offer **perforating knives and blades** up to 500 mm outside diameter.

To ask for specific size and dimensions for the **perforating knives and blades**, and for all other information, please CONTACT US.

## Punch Knives

INO-DJT established its reputation in many years of manufacturing **Punch Knives**, to meet needs of variety industries. With our highly experienced team and high-tech machines we manufacture durable **punch knives**, made strictly by the customer request.

We produce and supply a wide variety of high quality **punch knives**, with wide range of tooth patterns for plastic bag holes and multivac machinery.

Except that, our punch knife range covers a wide variety of industries, such as:

- Abrasives
- Carpet
- Food processing
- Leather
- Metals and foils
- Paper
- Packaging
- Poultry
- Plastics
- Rubber
- Textiles

We use high quality tool steels and stainless steels specifically selected for your industry, such as 52100, D-2/3, 0-1, M-2, ASP 23, or you can see more materials on section MATERIALS.

To ask for specific size and dimensions for the **punch knives**, and for all other information, please CONTACT US.

## Shear Slitters

INO-DJT established its reputation in many years of manufacturing **Shear Slitters**, to meet needs of variety industries. With our highly experienced team and high-tech machines we manufacture durable **shear slitters**, made strictly by the customer request.

We produce and supply a wide variety of high quality **shear slitters**, which are used to shear a wide range of materials. Material for **shear slitters** varies on the material to be cut and INO-DJT can provide a wide range of share slitters in various popular materials.

Our shear slitter range covers a wide variety of industries, such as:

- Abrasives
- Carpet
- Food processing
- Leather
- Metals and foils
- Paper
- Packaging
- Poultry
- Plastics
- Rubber
- Textiles

We use high quality tool steels and stainless steels specifically selected for your industry, such as 52100, D-2/3, 0-1, M-2, ASP 23, or you can see more materials on section MATERIALS.

We can offer **shear slitters** up to 300 mm.

To ask for specific size and dimensions for the **shear slitters**, and for all other information, please CONTACT US.

## Straight Knives

INO-DJT established its reputation in many years of manufacturing **Straight Knives**, to meet needs of variety industries. With our highly experienced team and high-tech machines we manufacture durable **straight knives**, made strictly by the customer request.

We produce and supply a wide variety of high quality **straight knives**, and our products are always made in a high tolerance. In our offer you can find smooth edge straight blade, straight knife with perforation, toothed, serrated and saw tooth forms.

Our **straight knives and blades** range covers a wide variety of industries, such as:

- Abrasives
- Carpet
- Food processing
- Leather
- Metals and foils
- Paper
- Packaging
- Poultry
- Plastics
- Rubber
- Textiles

We use high quality tool steels and stainless steels specifically selected for your industry, such as 52100, D-2/3, 0-1, M-2, ASP 23, or you can see more materials on section MATERIALS.

We can offer **straight knives** and blades up to 800 mm length.

To ask for specific size and dimensions for the **straight knives and blades**, and for all other information, please CONTACT US.

## Special Knives

INO-DJT established its reputation in many years of manufacturing **knives for special purposes (Special Knives)**, to meet needs of variety industries. With our highly experienced team and high-tech machines we manufacture durable **special knives**, made strictly by the customer request.

We produce and supply a wide variety of high quality **special knives**, and our products are always made in a high tolerance. Material for **special knives** varies on the material to be cut and INO-DJT can produce a wide range of **special knives** in various popular materials.

Our range covers a wide variety of industries, such as:

- Abrasives
- Carpet
- Food processing
- Leather
- Metals and foils
- Paper
- Packaging
- Poultry
- Plastics
- Rubber
- Textiles

We use high quality tool steels and stainless steels specifically selected for your industry, such as 52100, D-2/3, 0-1, M-2, ASP 23, or you can see more materials on section MATERIALS.

To ask for specific size and dimensions for the **special knives**, and for all other information, please CONTACT US.
